Where can I see or view an **image** or picture of a RoomMaster **hotel**?
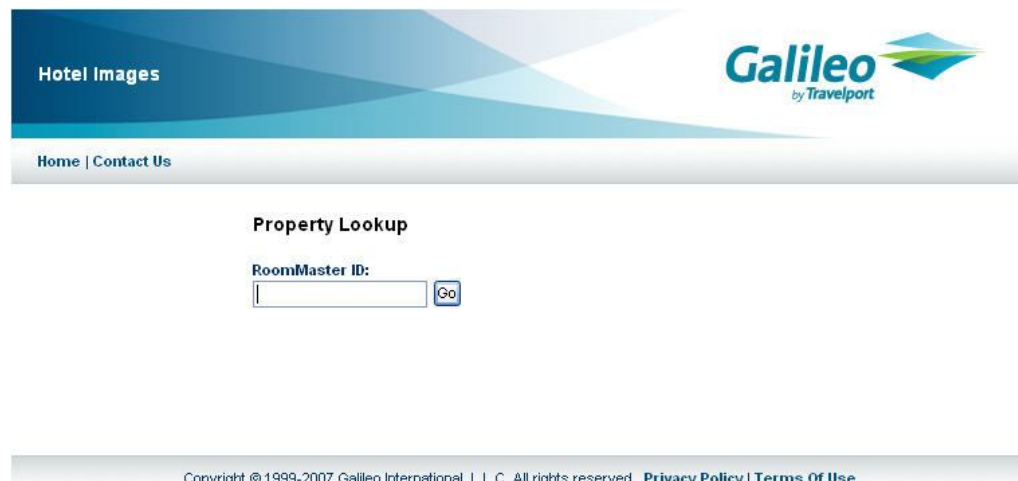

Answer Id 1973

Where can I see or view an **image** or picture of a RoomMaster **hotel**?

Galileo provides an Internet URL that links you to a database that holds photographs of many thousands of properties. You can access these to help you sell a **hotel** to your customer.

Note: The database is extensive an constantly being updated, but does not hold **images** for every **hotel** in the system.

Galileo **Hotel Images** is a free product that you can access via the Internet and no user id or password is required. To access the Galileo **Hotel Images** web site, open your Internet browser and enter the URL: http://vfmii.com/media/resource/galileo/

Screen response: Fig. 1973_01.jpg

Enter the RoomMaster property id number and you will be taken directly to colour photographs of the property.
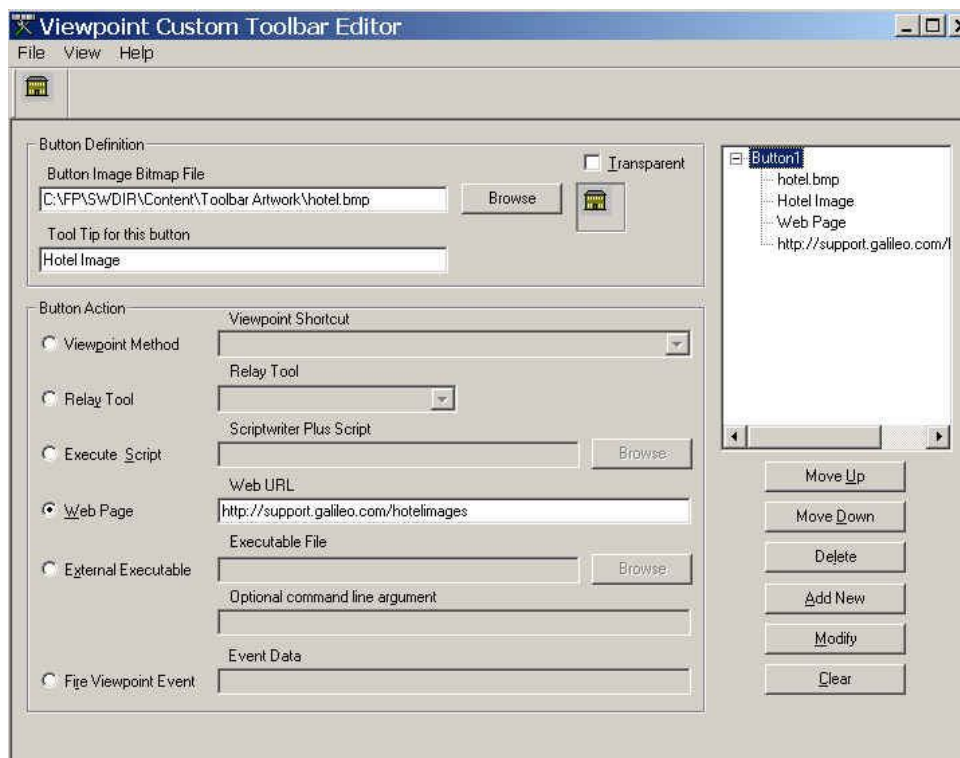

Screen example: Fig. 1973_02.jpg

Note: Click on a thumbnail on the left hand side of the screen to increase the size of the **image**.

You can add a button onto your Galileo Desktop toolbar or Focalpoint 3.5 companions menu.

1. Go to Tools and select Viewpoint Custom Toolbar Editor.

2. Select an appropriate button **image** and specify a Tool Tip

3. Click the Web Page radio button and enter the **Hotel Images** URL, and click Add.
